

1 Plaintiff [REDACTED] (“Plaintiff”), by his attorneys, except for his own acts, which  
2 are alleged on knowledge, alleges the following based upon the investigation of counsel, which  
3 included a review of United States Securities and Exchange Commission (“SEC”) filings by XOMA  
4 Corporation (“XOMA” or the “Company”), as well as regulatory filings and reports, securities  
5 analyst reports and advisories by the Company, press releases and other public statements issued by  
6 the Company, and media reports about the Company. Plaintiff believes that additional evidentiary  
7 support will exist for the allegations set forth herein after a reasonable opportunity for discovery:

8 **I. NATURE OF THE ACTION**

9 1. This is a securities class action on behalf of all persons who purchased XOMA  
10 common stock between November 6, 2014 and July 21, 2015, inclusive (the “Class Period”),  
11 seeking remedies under the Securities Exchange Act of 1934 (the “Exchange Act”). Plaintiff’s  
12 claims are asserted against certain of XOMA and certain of its current executive officers.

13 2. XOMA is a biotech drug company that purports to discover and develop innovative  
14 antibody-based therapeutics. Its lead product candidate is gevokizumab, which the Company  
15 describes gevokizumab as “a proprietary potent, humanized allosteric-modulating monoclonal  
16 antibody that binds to the inflammatory cytokine interleukin-1 beta (“IL-1 beta”).” The Company  
17 has asserted that it believed that gevokizumab “has the potential to address the underlying  
18 inflammatory causes of a wide range of diseases that have been identified as having unmet medical  
19 needs.”

20 3. XOMA developed the drug, gevokizumab, to treat, among other things, Behçet’s  
21 disease uveitis, a multisystem inflammatory disorder most commonly involving the eyes which  
22 could lead to blindness.

23 4. The Company has initiated three clinical trials to evaluate gevokizumab for the  
24 treatment of non-infectious intermediate, posterior or pan-uveitis (“NIU”) and Behçet’s disease  
25 uveitis. Among the three gevokizumab trials is the Phase 3 EYEGUARD-B study for patients with  
26 Behçet’s disease uveitis outside of the United States.

1           5.       Since November 6, 2014, the Company has repeatedly made material  
2 misrepresentations and omitted material information concerning the imminently commercialization  
3 of gevokizumab. Specifically, the Company made misrepresentations and omitted information that  
4 led the investors to believe that the Phase 3 EYEGUARD-B study of gevokizumab, would be  
5 concluded successfully and that approval from the U.S. Food and Drug Administration (“FDA”)  
6 would then be sought.

7           6.       For example, on March 11, 2015, Paul D. Rubin (“Rubin”), XOMA’s Chief Medical  
8 Officer and Senior Vice President (“SVP”) of Research and Development (“R&D”) discussed the  
9 Company’s optimism with regard to the outcome of the gevokizumab EYEGUARD-B study.  
10 Speaking of the data acquired, Defendant Rubin stated, “although we don’t know who’s on active  
11 and who’s on placebo, if you had an active drug, this is sort of the pattern you would expect to see,”  
12 misleading the market to believe that the outcome would be successful.

13           7.       On May 7, 2015, after the close of the market, Defendant John W. Varian  
14 (“Varian”), the Chief Executive Officer and a director of XOMA, told the market that gevokizumab  
15 was “one exacerbation away from being able to close the EYEGUARD-B study database” and that  
16 investors should expect to “be getting to that final targeted exacerbation any day now.” As the  
17 market digested this news, the trading volume of XOMA spiked and its share price climbed over  
18 12%, from the closing at \$3.29 on May 7, 2015, to close at \$3.70 on May 8, 2015.

19           8.       On May 28, 2015, XOMA informed the market that it had reached its target  
20 exacerbation event as specified in the gevokizumab EYEGUARD-B study causing an increase in  
21 trading and leading to nearly an 8% jump in its share price on the day of the news.

22           9.       On July 22, 2015, the Company revealed that the gevokizumab EYEGUARD-B  
23 study did not meet the primary endpoint of first acute ocular exacerbation.

24           10.      On this news, the price of XOMA common stock sank. Its share price fell \$3.48, or  
25 over 79%, in premarket trading, from a closing share price of \$4.39 on July 21, 2015 to open at  
26 \$0.91 per share on July 22, 2015 on *extremely* heavy trading volume.

1 **II. JURISDICTION AND VENUE**

2 11. The federal law claims asserted herein arise under §§ 10(b) and 20(a) of the  
3 Exchange Act, 15 U.S.C. § 78j(b) and § 78t(a), and Rule 10b-5 promulgated thereunder by the SEC,  
4 17 C.F.R. § 240.10b-5, as well as under the common law.

5 12. This Court has subject matter jurisdiction over this action pursuant to 28 U.S.C.  
6 § 1331 and § 27 of the Exchange Act, 15 U.S.C. §78aa.

7 13. This Court has jurisdiction over each Defendant named herein because each  
8 Defendant is an individual who has sufficient minimum contacts with this District so as to render  
9 the exercise of jurisdiction by the District Court permissible under traditional notions of fair play  
10 and substantial justice.

11 14. Venue is proper in this Court pursuant to 28 U.S.C. § 1391(b) and § 27 of the  
12 Exchange Act because many of the false and misleading statements were made in or issued from  
13 this District. XOMA is headquartered in this District, with its principal place of business located at  
14 2910 Seventh Street, Berkeley, California 94710.

15 **III. PARTIES**

16 15. Plaintiff purchased XOMA's securities as set forth herein and in its certification filed  
17 herewith.

18 16. XOMA is a corporation organized and existing under the laws of the State of  
19 Delaware. It maintains its principal corporate offices at 2910 Seventh Street, Berkeley, California  
20 94710. Its common stock trades on NASDAQ Global Market ("NASDAQ") under the symbol,  
21 "XOMA."

22 17. Defendant Varian has a director of the Company since December 2008 and was  
23 appointed as CEO in January 2012 after serving as Interim CEO since August 31, 2011.

24 18. Defendant Rubin has been the Chief Medical Officer and SVP of R&D since June  
25 2011.

26 19. Defendants Varian and Rubin are collectively referred to herein as the "Individual  
27 Defendants."

1           20. XOMA and the Individual Defendants are collectively referred to herein as  
2 “Defendants.”

3           21. By reason of the Individual Defendants’ positions with the Company as officers  
4 and/or directors, possessed the power and authority to control the contents of XOMA’s quarterly  
5 reports, press releases, and presentations to securities analysts, money and portfolio managers, and  
6 institutional investors, *i.e.*, the market. They were provided with copies of the Company’s reports  
7 and press releases alleged herein to be misleading prior to or shortly after their issuance and had the  
8 ability and opportunity to prevent their issuance or cause them to be corrected. Because of their  
9 positions with the Company, and their access to material, non-public information available to them  
10 but not to the public, the Individual Defendants knew that the adverse facts specified herein had not  
11 been disclosed to and were being concealed from the public, and that the positive representations  
12 being made were then materially false and misleading. The Individual Defendants are liable for the  
13 false statements pleaded herein.

#### 14 **IV. SUBSTANTIVE ALLEGATIONS**

##### 15 **A. Background**

16           22. XOMA is a biotech drug company that purports to discover and develop innovative  
17 antibody-based therapeutics. Its lead product candidate is gevokizumab, which the Company  
18 describes as “a proprietary potent, humanized allosteric-modulating monoclonal antibody that binds  
19 to the inflammatory cytokine interleukin-1 beta (“IL-1 beta”).” The Company has asserted that it  
20 believed that gevokizumab “has the potential to address the underlying inflammatory causes of a  
21 wide range of diseases that have been identified as having unmet medical needs.”

22           23. The Company describes gevokizumab as “a proprietary potent, humanized allosteric-  
23 modulating monoclonal antibody that binds to the inflammatory cytokine interleukin-1 beta (“IL-1  
24 beta”).” The Company has asserted that it believed that gevokizumab “has the potential to address  
25 the underlying inflammatory causes of a wide range of diseases that have been identified as having  
26 unmet medical needs.”

1 24. XOMA developed the drug, gevokizumab, to treat, among other things, Behçet’s  
2 disease uveitis, a multisystem inflammatory disorder most commonly involving the eyes which  
3 could lead to blindness.

4 25. Together with Servier, the Company initiated three clinical trials to evaluate  
5 gevokizumab for the treatment of non-infectious intermediate, posterior or pan-uveitis (“NIU”) and  
6 Behçet’s disease uveitis. Among the three gevokizumab trials is the Phase 3 EYEGUARD-B study  
7 for patients with Behçet’s disease uveitis outside of the United States.

8 **B. The Material Misrepresentations and Omissions**

9 26. On November 6, 2014 the beginning of the Class Period, the Company issued a press  
10 release announcing its results for the quarter ended September 30, 2014. The press release stated in  
11 relevant part:

12 **Recent Highlights:**

- 13 • Opened EYEGUARD-US, a clinical trial conducted at centers in the  
14 United States to study gevokizumab in patients with active or controlled  
15 Behçet's disease uveitis as part of a broader strategy to file the first  
16 Biologics Licensing Application (BLA) for gevokizumab in Behçet's  
17 disease uveitis.

18 \* \* \*

19 "Our clinical development teams have been very productive in the past few  
20 months, opening both the EYEGUARD-US clinical study and the  
21 gevokizumab Phase 3 pyoderma gangrenosum study, while driving enrollment  
22 in our EYEGUARD-A and -C trials. They also exceeded our expectations with  
23 the launch of a Phase 1 study for XOMA 358, a novel monoclonal antibody  
24 discovered and developed at XOMA," stated John Varian, Chief Executive  
25 Officer of XOMA. "The EYEGUARD program, particularly the studies in  
26 Behçet's disease uveitis, puts us on the pathway to submit XOMA's first  
27 Biologics Licensing Application for gevokizumab, approval of which allows  
28 us to achieve our goal of transforming into a commercial organization  
marketing our products to the U.S. specialist prescriber.

29 27. During the Company’s third quarter 2014 earnings call held on November 6, 2014  
30 (“3Q14 Earnings Call”), after the close of the market, Defendant Varian stated, in relevant part:

31 As we've said though, we are not waiting. We continue to move forward with  
32 the activities that will allow us to pursue Behçet's disease uveitis as our first  
33 BLA submission for gevokizumab. Specifically, we are preparing analyses of  
34 the previously generated gevokizumab Phase 2 data in Behçet's uveitis  
35 patients, such that it can be supportive of the EYEGUARD-B pivotal study.

1 We also initiated the supplemental EYEGUARD-U.S. study in September.  
2 Paul and I will discuss the study design and potential role for you today. Once  
3 we have the EYEGUARD-B data results in hand, assuming of course that they  
4 are positive, we will take the steps to request a pre-BLA meeting with FDA.

5 Today, we'd like to provide more clarity about the EYEGUARD-B study and  
6 Servier's progress with it. In May, we reported that Servier had informed that  
7 75% of the number of pre-set targeted exacerbations that allow the unmasking  
8 of the data had occurred, and that Servier predicted the final event would  
9 happen in June.

10 I have asked Paul to spend a good portion of his comments today discussing  
11 our detailed learnings since we spoke with you last. Our learnings are  
12 encouraging to our ultimate goal and should give you a good understanding of  
13 how we got from where we were back in May to where we are today. We're  
14 getting closer to having the data, but as I said, we're not waiting. Our entire  
15 team is running flat-out to create additional opportunities for success.

16 \* \* \*

17 We've chosen a Behçet's disease uveitis first strategies specifically because it  
18 allows us to take our fate into our own hands, once we have the EYEGUARD-  
19 B data from Servier. If we can gain approval in Behçet's disease uveitis, we  
20 believe we only need a positive result from either EYEGUARD-A or  
21 EYEGUARD-C to seek the broader, but still orphan indication of non-  
22 infectious uveitis.

23 \* \* \*

24 Drug development is never as clear cut as one expects or hopes. There are  
25 many, many variables and dynamics that change rapidly and must be factored  
26 into your decision making. You have to have confidence that you will succeed  
27 in the end. We are moving gevokizumab in the right direction and we're  
28 working hard to ensure we have the multiple opportunities to succeed.

29 28. Following up on Defendant Varian's statements, Defendant Rubin stated the  
30 following at the 3Q14 Earnings Call concerning the raw data from EYEGUARD-B trial:

31 It is encouraging to see that there are still a significant number of ongoing  
32 patients in the trial, who have not experienced an exacerbation or have been  
33 rescued early. Many of them have been in the trial for over six months without  
34 issues, long after the steroid tapering has been completed.

35 29. On March 11, 2015, the Company issued a press release announcing its results for  
36 the quarter and full-year ended December 31, 2014. The press release stated in relevant part:

37 "The fourth quarter was focused on driving enrollment in all five of our  
38 gevokizumab Phase 3 clinical trials, completing our first XOMA 358 clinical  
39 study, and putting the Company on a strong financial footing to allow us to  
40 achieve our goal of transforming XOMA into a commercial organization  
41 marketing our products to the U.S. specialist prescriber," stated John Varian,  
42 Chief Executive Officer of XOMA. "Our clinical and regulatory teams are  
43 compiling the documentation required to submit a Biologics Licensing  
44 Application, in anticipation of positive EYEGUARD-B clinical results and

1 FDA interactions. By investing significant time now, we are doing all we can  
2 to expedite the process of requesting a pre-BLA meeting with FDA if we  
obtain positive primary endpoint results.

3 "With the encouraging proof-of-concept results in Scleritis, we have identified  
4 another potential indication for gevokizumab, and with the successful  
5 completion of the XOMA 358 Phase 1 study, we have demonstrated our ability  
to expand our product pipeline with another internally discovered compound  
that may lead to therapies for people who are living with conditions that are in  
clear need of new treatment options," Mr. Varian concluded.

6 30. During the Company's fourth quarter 2014 earnings call held on March 11, 2015  
7 ("4Q14 Earnings Call"), after the close of the market, Defendant Varian stated, in relevant part:

8 [W]e are not waiting for EYEGUARD-B results. We are taking the steps  
9 necessary to allow Behcet disease uveitis to be our first indication for  
10 gevokizumab. If EYEGUARD-B is positive, we will request a pre-BLA  
11 meeting with the FDA to review the study. Our pre-BLA package will also  
include the two Phase II studies Servier and we previously conducted in  
patients with Behcet disease uveitis, as well as the entire safety database we  
have compiled for gevokizumab.

12 \* \* \*

13 As we've said on many occasions, gevokizumab is our first, second, and third  
14 priority. In December 2012, we announced active, noninfectious anterior  
scleritis as one of the indications in our gevokizumab proof of concept  
program.

15 Scleritis is the inflammation of the sclera, or fibrous white membrane  
16 surrounding the eyeball, excluding the cornea. Scleritis is a chronic, painful  
inflammatory disease associated with systemic immune disorders including  
17 polyangiitis, which includes microscopic polyangiitis and giant cell arteritis.

18 Scleritis can lead to vision loss or blindness if left untreated. Scleritis is a rare  
19 disease with an estimated prevalence of approximately 18,000 patients in the  
U.S. The National Eye Institute or NEI conducted the open label proof of  
concept trial of gevokizumab in scleritis under Dr. [Nita Shen's] leadership.

20 The NEI has completed the study by enrolling eight patients with active,  
21 noninfectious anterior scleritis. The study objectives were to evaluate the  
safety and possible efficacy of gevokizumab in patients with active scleral  
inflammation at baseline.

22 Although the study is still ongoing, six of the eight study participants had a  
23 positive response in the first 16 weeks of gevokizumab treatment based on a  
standardized scale. We are very excited by these results, an indication which  
24 fits well with our strategic commercial focus for gevokizumab and our other  
pipeline programs. We will be working with NEI to design a possible  
25 multicenter controlled trial in this difficult to treat condition.

26 \* \* \*

27 We are all looking forward to the recurrence of the final ocular exacerbation in  
28 the EYEGUARD-B study. It will happen when it happens and we'll let you

1 know when the countdown to data analysis has started, but we are not waiting.  
 2 We are urgently taking steps to execute on our Behcet's first strategy.

3 We and Servier can see the light at the end of the tunnel for EYEGUARDs A  
 4 and C. We believe we need only one of these two studies, EYEGUARD-A or  
 5 EYEGUARD-C, to be positive in order to submit a supplemental BLA with  
 6 the FDA for the broader NIU indication providing we have approval from the  
 7 FDA in Behcet disease uveitis.

8 \* \* \*

9 We do see [with regard to the EYEGUARD-B study] that if patients get to a  
 10 certain point in time, the rate of exacerbation goes to virtually nothing. So  
 11 when Servier sized the study and it had a predicted rate of exacerbations, they  
 12 assumed every patient would exacerbate at some point in time, including  
 13 gevokizumab patients.

14 So when that line was drawn and the exacerbations were calculated, how many  
 15 patients needed to come in, there was an assumption that all patients would  
 16 exacerbate but hopefully the gevokizumab patients would be later  
 17 exacerbators. What we've seen, and we've said this, is that there is a group of  
 18 patients that in this study who've gone a very long time, and on average more  
 19 than nine months and even more than that, who have not exacerbated.

20 We know that all the patients that came into the study had to have had an  
 21 exacerbation in the previous four months, and they had to have at least one  
 22 more, and they had on average much more than one more, or more than one  
 23 more, in the previous 14 months, or within the total 18 month period.

24 So these patients were exacerbating as they came into the study. We are seeing  
 25 a group of patients who have gone a very long time and not having  
 26 exacerbated. So that has thrown off our calculations somewhat, of when  
 27 exacerbations would happen and when we would get to this point in time.

28 31. Following up on Defendant Varian's statements, Defendant Rubin stated the  
 following at the 4Q14 Earnings Call:

No, that's exactly right. As you know, the study is a [unintelligible] withdrawal  
 trial, and historically, and this is kind of evidenced by our first study that we  
 did in Turkish patients, when patients are not on an active therapy, they  
 exacerbate relatively quickly, that they fall below a therapeutic level of drug,  
 and that's what we saw in our Turkish patients. So in retrospect, we could have  
 probably predicted that the majority of the exacerbations would have occurred  
 in the first three months.

I think we kind of looked at it as linear. It's clearly not linear. There's a large  
 number at the beginning, which is exactly, when you understand the disease  
 and what we're doing to these patients, makes complete sense. What we didn't  
 know is that that rate would then kind of plateau with time. And that's exactly  
 what we're seeing. ***So although we don't know who's on active and who's on  
 placebo, if you had an active drug, this is sort of the pattern you would  
 expect to see.***

(Emphasis added).

\* \* \*

1 Now, since we're right at the finish line, I am going to give you some  
2 additional color. Servier has performed a Herculean task to bring this trial to  
3 this important moment. While I can't be exact, I think it's important to give you  
4 some general background to reflect how hard they've worked on the study,  
5 which they've consistently shown is extremely important to them.

6 EYEGUARD-B had an original target enrollment of more than 50, but less  
7 than 100 patients, which Servier hit last June. The study is a double-masked  
8 one-to-one 60 milligrams of gevokizumab to placebo randomized trial.

9 The targeted number of exacerbations we've been chasing to allow the  
10 unblinding of the study is approximately one-half the number of patients  
11 originally targeted for enrollment. So while we can't say the exact number, I  
12 hope you can appreciate that we were a long way down the road, when we  
13 were a handful away, and particularly now just one.

14 In the early months of the study the exacerbation rate was running at Servier's  
15 expected rate. What neither our partner nor we expected was that once patients  
16 progressed through the early months of the study without exacerbating, we  
17 would see a virtual cessation in exacerbations.

18 Since Servier anticipated patients would continue to exacerbate in later  
19 months, it has taken more time to reach the preset exacerbation target than  
20 anyone would have predicted. Once we realized this was happening, in order to  
21 achieve the targeted number of events, Servier continued to enroll patients in  
22 EYEGAURD-B on the original targeted number.

23 As of today, they have enrolled approximately 20 additional patients. The  
24 majority of this effort occurred since last December and has enabled us to  
25 reach the doorstep we stand at today. We believe the increase in patient  
26 numbers and extended length of time we've experienced in EYEGAURD-B  
27 helps generate important additional information, since long-term control of  
28 Behcet's disease uveitis is so crucial.

Based on our assumptions, the study has 90 percent power to detect the  
difference between treatment groups. The study's endpoint is the time to first  
exacerbation between the gevokizumab and placebo arms. As I said, if the  
database closing goes as planned, we'll be announcing the results  
approximately seven weeks after we report that final exacerbation has  
occurred.

34. On May 28, 2015, the Company issued a press release announcing that the  
gevokizumab Phase 3 EYEGUARD-B study, the same study that was the subject of the negative  
news on July 22, 2015, reached its target exacerbation event as specified in the study design. The  
positive news spurred XOMA's share price to rise nearly 8% on the day of the news. The press  
release stated in relevant part:

BERKELEY, Calif., May 28, 2015 (GLOBE NEWSWIRE) -- XOMA  
Corporation (Nasdaq:XOMA), a leader in the discovery and development of  
therapeutic antibodies, today announced that the gevokizumab Phase 3

1 EYEGUARD-B study, sponsored by its development partner Servier, reached  
2 its target exacerbation event as specified in the study design. The objective of  
3 the first part of this study is to demonstrate the superiority of gevokizumab, as  
4 compared to placebo, on top of the current standard of care  
5 (immunosuppressant therapy and oral corticosteroids) in reducing the risk of  
6 Behçet's disease uveitis exacerbations and to assess the safety of gevokizumab.

7 Servier now will begin the process of closing the clinical database and  
8 analyzing the data from this part of the study. Servier has provided a detailed  
9 schedule of the activities it will undertake to allow the locking of the database.  
10 The primary endpoint result is expected in approximately seven weeks. The  
11 trial is ongoing and remains double-masked for the extension period of the  
12 study.

13 The Phase 3 EYEGUARD-B study (A randomisEd, double-masked, placebo-  
14 controlled studY of the Efficacy of GevokizUmAb in the tReatment of patients  
15 with Behçet's Disease uveitis) was designed to enroll patients with a history of  
16 Behçet's disease uveitis with ocular involvement of the posterior segment who  
17 have experienced a recent ocular exacerbation that was treated successfully  
18 with high doses of corticosteroids. Patients were randomized to either a 60 mg  
19 dose of gevokizumab or placebo administered subcutaneously once monthly on  
20 top of their current immunosuppressive and corticosteroid therapies. The  
21 primary endpoint is the time to first acute ocular exacerbation.

### 22 C. The Truth Emerges

23 35. On July 22, 2015, prior to the opening of the market, the Company issued a press  
24 release announcing that its pivotal Phase 3 clinical study evaluating gevokizumab for the treatment  
25 of patients with Behçet's disease uveitis outside the United States, EYEGUARD-B, missed the  
26 primary endpoint of time to first acute ocular exacerbation. The press release stated in relevant part:

27 BERKELEY, Calif., July 22, 2015 (GLOBE NEWSWIRE) -- XOMA  
28 Corporation (Nasdaq:XOMA), a leader in the discovery and development of  
therapeutic antibodies, today announced the Phase 3 EYEGUARD-B study of  
gevokizumab in patients with Behçet's disease uveitis, run by its partner  
Servier, an independent French pharmaceutical research company driven by  
the pursuit of innovative drugs, did not meet the primary endpoint of time to  
first acute ocular exacerbation.

"Although the study did not achieve its main objective, we did see signals of  
drug activity such as preserved visual acuity, less severe ocular exacerbations  
and a reduced incidence of reported macular edema in patients treated with  
gevokizumab," said Paul Rubin MD, Senior Vice President Research and  
Development and Chief Medical Officer. "We will continue to work closely  
with our partner, Servier, and uveitis experts to conduct a thorough analysis of  
the data to fully understand gevokizumab's impact on several clinically  
relevant endpoints."

"The initial observations seen in the secondary endpoints are clinically  
important and meaningful to both clinicians and Behçet's disease uveitis  
patients," stated Dr. Ilknur Tugal-Tutkun, international coordinator for the  
EYEGUARD-B study and Professor of Ophthalmology, Head, Ocular  
Immunology and Uveitis Service at Istanbul University, Istanbul Faculty of

1 Medicine, Department of Ophthalmology. "We look forward to learning  
2 more."

3 "In recent years, our public focus has been on gevokizumab. However, during  
4 that time, we have significantly advanced other assets in our pipeline including  
5 XOMA 358, for which we completed a positive Phase 1 study showing it is  
6 active in down-regulating the insulin receptor and shows potential in treating  
7 patients who experience endogenous over-production of insulin, and XOMA  
8 089, our late preclinical anti-TGF $\beta$  monoclonal antibody with potential in  
9 immuno-oncology and fibrosis," said John Varian, Chief Executive Officer of  
10 XOMA. "We will focus our efforts on creating value with these pipeline assets  
11 and reduce expenses where appropriate. While we continue to evaluate the data  
12 from EYEGUARD-B, the EYEGUARD-A and C studies, in the broader range  
13 of non-infectious uveitis, are still recruiting."

14 Gevokizumab appeared to be well tolerated in the trial. Adverse events were  
15 comparable between gevokizumab and placebo treated groups.

16 \* \* \*

#### 17 EYEGUARD-B Study Design

18 The objective of the Phase 3 EYEGUARD-B study (A randomisEd, double-  
19 masked, placebo-controlled studY of the Efficacy of GevokizUmAb in the  
20 tTreatment of patients with Behçet's Disease uveitis) was to demonstrate the  
21 superiority of gevokizumab, compared with placebo, on top of the current  
22 standard of care in reducing the risk of Behçet's disease uveitis exacerbations  
23 and to assess the safety of gevokizumab. The study was designed to enroll  
24 patients with a history of Behçet's disease uveitis with ocular involvement of  
25 the posterior segment who had experienced a recent ocular exacerbation that  
26 was treated successfully with high doses of corticosteroids.

27 The trial enrolled a total of 83 patients in the core part of the study (40 on  
28 gevokizumab and 43 on placebo). Patients were randomized to either a 60 mg  
dose of gevokizumab or placebo administered subcutaneously once monthly on  
top of their current immunosuppressive and corticosteroid therapies. They  
were randomized when they reached the step of 20 mg/day equivalent oral  
prednisone and continued a standardized tapering regimen until they reached 5  
mg/day during double-masked treatment.

The primary endpoint was the time to first acute ocular exacerbation.  
Secondary endpoints included total number of exacerbations, best corrected  
visual acuity, vitreous haze, retinal lesions, fundus assessments and macular  
edema.

36. As the result of this news, the share price of the Company's common stock plunged  
\$3.48 in premarket trading, from a closing share price of \$4.39 on July 21, 2015 to open at \$0.91  
per share on July 22, 2015, or over 79%, on *extremely* heavy trading volume.

#### 25 V. LOSS CAUSATION

26 37. During the Class Period, as detailed herein, Defendants made false and misleading  
27 statements and engaged in a scheme to deceive the market and a course of conduct that artificially  
28

1 inflated the price of XOMA's securities and operated as a fraud or deceit on Class Period  
2 purchasers of XOMA securities by materially misleading the investing public. Later, when  
3 Defendants' prior misrepresentations and fraudulent conduct became apparent to the market, the  
4 price of XOMA's securities fell precipitously, as the prior artificial inflation came out of the price  
5 over time. As a result of their purchases of XOMA's securities during the Class Period, Plaintiff and  
6 other members of the Class suffered economic loss, *i.e.*, damages, under the federal securities laws.

#### 7 **VI. FRAUD-ON-THE-MARKET DOCTRINE**

8 38. At all relevant times, the market for XOMA's securities was an efficient market for  
9 the following reasons, among others:

- 10 a) XOMA securities met the requirements for listing, and was listed and  
11 actively traded on NASDAQ, a highly efficient and automated market;
- 12 b) XOMA filed periodic public reports with the SEC and NASDAQ; and
- 13 c) XOMA regularly communicated with public investors via established market  
14 communication mechanisms, including regular disseminations of press releases on the  
15 national circuits of major newswire services and other wide-ranging public disclosures, such  
16 as communications with the financial press and other similar reporting services.

17 39. As a result of the foregoing, the market for XOMA's securities promptly digested  
18 current information regarding XOMA from all publicly available sources and reflected such  
19 information in the prices of the securities. Under these circumstances, all purchasers of XOMA  
20 securities during the Class Period suffered similar injury through their purchase of XOMA  
21 securities at artificially inflated prices and a presumption of reliance applies.

#### 22 **VII. NO SAFE HARBOR**

23 40. The statutory safe harbor provided for forward-looking statements under certain  
24 circumstances does not apply to any of the allegedly false statements pleaded in this Complaint. The  
25 statements alleged to be false and misleading herein all relate to then-existing facts and conditions.  
26 In addition, to the extent certain of the statements alleged to be false may be characterized as  
27 forward looking, they were not identified as "forward-looking statements" when made and there  
28

1 were no meaningful cautionary statements identifying important factors that could cause actual  
2 results to differ materially from those in the purportedly forward-looking statements. In the  
3 alternative, to the extent that the statutory safe harbor is determined to apply to any forward-looking  
4 statements pleaded herein, Defendants are liable for those false forward-looking statements because  
5 at the time each of those forward-looking statements was made, the speaker had actual knowledge  
6 that the forward-looking statement was materially false or misleading, and/or the forward-looking  
7 statement was authorized or approved by an executive officer of XOMA who knew that the  
8 statement was false when made.

### 9 **VIII. CLASS ACTION ALLEGATIONS**

10 41. Plaintiff brings this action as a class action pursuant to Rule 23 of the Federal Rules  
11 of Civil Procedure on behalf of all persons who purchased or otherwise acquired XOMA securities  
12 during the Class Period (the "Class"). Excluded from the Class are Defendants and their families,  
13 the officers and directors of the Company, at all relevant times, members of their immediate  
14 families and their legal representatives, heirs, successors, or assigns, and any entity in which  
15 Defendants have or had a controlling interest.

16 42. The members of the Class are so numerous that joinder of all members is  
17 impracticable, since XOMA has millions of shares of stock outstanding and because the Company's  
18 shares were actively traded on NASDAQ. According to XOMA's Form 10-Q filed with the SEC on  
19 May 7, 2015, as of May 5, 2015, XOMA had approximately 117.8 million shares issued and  
20 outstanding. While the exact number of Class members is unknown to Plaintiff at this time and can  
21 only be ascertained through appropriate discovery, Plaintiff believes that there are thousands of  
22 members in the proposed Class and that they are geographically dispersed.

23 43. There is a well-defined community of interest in the questions of law and fact  
24 involved in this case. Questions of law and fact common to the members of the Class which  
25 predominate over questions which may affect individual Class and Private Placement Class  
26 members include:

- 27 (a) whether the Exchange Act was violated by Defendants;

1 (b) whether Defendants omitted and/or misrepresented material facts in their  
2 publicly disseminated press releases and statements during the Class Period;

3 (c) whether Defendants' statements omitted material facts necessary to make the  
4 statements made, in light of the circumstances under which they were made, not misleading;

5 (d) whether Defendants participated and pursued the fraudulent scheme or course  
6 of business complained of herein;

7 (e) whether Defendants acted willfully, with knowledge or recklessly in omitting  
8 and/or misrepresenting material facts;

9 (f) whether the price of XOMA securities was artificially inflated during the  
10 Class Period as a result of the material nondisclosures and/or misrepresentations complained  
11 of herein; and

12 (g) whether the members of the Class have sustained damages as a result of the  
13 decline in value of XOMA's stock when the truth was revealed, and if so, what is the  
14 appropriate measure of damages.

15 44. Plaintiff's claims are typical of those of the Class because Plaintiff and the Class  
16 sustained damages from Defendants' wrongful conduct in a substantially identical manner.

17 45. Plaintiff will adequately protect the interests of the Class and has retained counsel  
18 who are experienced in class action securities litigation. Plaintiff has no interests which conflict  
19 with those of the Class.

20 46. A class action is superior to other available methods for the fair and efficient  
21 adjudication of this controversy.

22 **CLAIMS FOR RELIEF**

23 **COUNT I**

24 **Against XOMA for Violation of Section 10(b) of**  
25 **the Exchange Act and SEC Rule 10b-5**  
26 **(on behalf of the Class)**

27 47. Plaintiff incorporates by reference each and every preceding paragraph as though  
28 fully set forth herein.

1           48. This Count is asserted by Plaintiffs on behalf of themselves and the Class against all  
2 the Defendants and is based upon Section 10(b) of the Exchange Act, 15 U.S.C. § 78j(b), and Rule  
3 10b-5, 17 C.F.R. C 240.10b-5, promulgated thereunder.

4           49. During the Class Period, Defendants carried out a plan, scheme, and course of  
5 conduct that was intended to and, throughout the Class Period, did: (i) deceive the investing public,  
6 including Plaintiffs and other Class members, as alleged herein; (ii) artificially inflate and maintain  
7 the market price of XOMA's common stock; and (iii) cause Plaintiffs and other members of the  
8 Class to purchase or otherwise acquire XOMA's common stock at artificially inflated prices. In  
9 furtherance of this unlawful scheme, plan, and course of conduct, the Defendants, and each of them,  
10 took the actions set forth herein.

11           50. Defendants, by the use of means and instrumentalities of interstate commerce:  
12 (i) employed devices, schemes, and artifices to defraud; (ii) made untrue statements of material fact  
13 and/or omitted to state material facts necessary to make the statements made not misleading; and  
14 (iii) engaged in acts, practices, and a course of business that operated as a fraud and deceit upon the  
15 purchasers and acquirers of the Company's common stock in an effort to maintain artificially high  
16 market prices for XOMA's common stock in violation of Section 10(b) of the Exchange Act and  
17 Rule 10-5.

18           51. As a result of their making and/or their substantial participation in the creation of  
19 affirmative statements and reports to the investing public, Defendants had a duty to promptly  
20 disseminate truthful information that would be material to investors in compliance with the  
21 integrated disclosure provisions of the SEC, as embodied in SEC Regulation S-K (17 C.F.R. §  
22 229.10, et seq.) and other SEC regulations, including accurate and truthful information with respect  
23 to the Company's operations and performance so that the market prices of the Company's publicly  
24 traded securities would be based on truthful, complete, and accurate information. Defendants'  
25 material misrepresentations and omissions as set forth herein violated that duty.

26           52. Defendants engaged in the fraudulent activity described above knowingly and  
27 intentionally or in such a reckless manner as to constitute willful deceit and fraud upon Plaintiffs  
28

1 and the Class. Defendants knowingly or recklessly caused their reports and statements to contain  
2 misstatements and omissions of material fact as alleged herein.

3 53. As a result of Defendants' fraudulent activity, the market price of XOMA was  
4 artificially inflated during the Class Period.

5 54. In ignorance of the true financial condition of XOMA, Plaintiffs and other members  
6 of the Class, relying on the integrity of the market and/or on the statements and reports of XOMA  
7 containing the misleading information, purchased or otherwise acquired XOMA's common stock at  
8 artificially inflated prices during the Class Period.

9 55. Plaintiff and the Class's losses were proximately caused by Defendants' active and  
10 primary participation in XOMA's scheme to defraud the investing public by, among other things,  
11 failing to fully and accurately disclose to investors adverse material information regarding the  
12 Company. Plaintiff and other members of the Class purchased XOMA's stock in reliance on the  
13 integrity of the market price of that common stock, and Defendants manipulated the price of  
14 XOMA's common stock through their misconduct as described herein. Plaintiff's and the Class's  
15 losses were a direct and foreseeable consequence of Defendants' concealment of the true financial  
16 condition of XOMA.

17 56. Throughout the Class Period, Defendants were aware of material non-public  
18 information concerning XOMA's fraudulent conduct (including the false and misleading statements  
19 described herein). Throughout the Class Period, Defendants willfully and knowingly concealed this  
20 adverse information, and Plaintiff's and the Class's losses were the foreseeable consequence of  
21 Defendants' concealment of this information.

22 57. As a direct and proximate cause of the Defendants' wrongful conduct, Plaintiff and  
23 other members of the Class suffered damages in connection with their respective purchases and  
24 sales of XOMA common stock during the Class Period.

**COUNT II**

**Against Individual Defendants for Violation of Section 20(a) of the Exchange Act  
(on behalf of the Class)**

1  
2  
3 58. Plaintiff incorporates by reference and realleges each and every allegation above as  
4 though fully set forth herein.

5 59. During the Class Period, each of the Individual Defendants, as senior executive  
6 officers and/or directors of XOMA, were privy to non-public information concerning the Company  
7 and its business and operations via access to internal corporate documents, conversations and  
8 connections with other corporate officers and employees, attendance at management and Board of  
9 Directors meetings and committees thereof and via reports and other information provided to them  
10 in connection therewith. Because of their possession of such information, the Individual Defendants  
11 knew or recklessly disregarded the fact that adverse facts specified herein had not been disclosed to,  
12 and were being concealed from, the investing public. Plaintiff and other members of the Class had  
13 no access to such information, which was, and remains solely under the control of the Defendants.

14 60. The Individual Defendants were involved in drafting, producing, reviewing and/or  
15 disseminating the materially false and misleading statements complained of herein. The Individual  
16 Defendants were aware (or recklessly disregarded) that materially false and misleading statements  
17 were being issued by the Company and nevertheless approved, ratified and/or failed to correct those  
18 statements, in violation of federal securities laws. Throughout the Class Period, the Individual  
19 Defendants were able to, and did, control the contents of the Company's SEC filings, reports, press  
20 releases, and other public statements. The Individual Defendants were provided with copies of,  
21 reviewed and approved, and/or signed such filings, reports, releases and other statements prior to or  
22 shortly after their issuance and had the ability or opportunity to prevent their issuance or to cause  
23 them to be corrected.

24 61. The Individual Defendants also were able to, and did, directly or indirectly, control  
25 the conduct of XOMA's business, the information contained in its filings with the SEC, and its  
26 public statements. Moreover, the Individual Defendants made or directed the making of affirmative  
27 statements to securities analysts and the investing public at large, and participated in meetings and  
28 discussions concerning such statements. Because of their positions and access to material non-

1 public information available to them but not the public, each of the Individual Defendants knew that  
2 the adverse facts specified herein had not been disclosed to and were being concealed from the  
3 public and that the positive representations that were being made were false and misleading. As a  
4 result, each of the Individual Defendants is responsible for the accuracy of XOMA's corporate  
5 releases detailed herein and is therefore responsible and liable for the misrepresentations contained  
6 herein.

7 62. Individual Defendants acted as controlling persons of XOMA within the meaning of  
8 Section 20(a) of the Exchange Act. By reason of their positions with the Company, Individual  
9 Defendants had the power and authority to cause XOMA to engage in the wrongful conduct  
10 complained of herein. Individual Defendants controlled XOMA and all of its employees. As  
11 alleged above, XOMA is a primary violator of section 10(b) of the Exchange Act and SEC Rule  
12 10b-5. By reason of their conduct, Individual Defendants are liable pursuant to section 20(a) of the  
13 Exchange Act.

14 63. As a direct and proximate result of the wrongful conduct of XOMA and Individual  
15 Defendants, Plaintiff and members of the Class suffered damages in connection with their  
16 respective purchases and sales of the Company's securities during the Class Period.

17 **PRAYER**

18 **WHEREFORE**, Plaintiff demands judgment as follows:

19 (A) Declaring this action to be a class action pursuant to Rule 23 of the Federal Rules of  
20 Civil Procedure and certifying Plaintiff as a representative of the Class and his counsel as Class  
21 counsel;

22 (B) Awarding Plaintiff and the members of the Class damages, including interest;

23 (C) Awarding Plaintiff and the Class their reasonable costs and expenses incurred in this  
24 action, including and attorneys' fees; and

25 (D) Awarding such equitable/injunctive or other relief as the Court may deem just and  
26 proper
